

PETLU LINU ZENAS PAUL

 +919010736000  petluzenas@gmail.com  linkedin.com/in/linuzenas  github.com/linuzenas  Portfolio

Summary

B.Tech IT student with experience in full-stack development, machine learning, and data-driven applications. Skilled in React, Next.js, Python, and SQL, with hands-on work in computer vision, automation systems, and real-world ML deployments.

Education

Kalasalingam University

Expected Graduation: April 2027

Bachelor of Information Technology — 7th Sem

Krishnan Koil, TN

- **Relevant Courses:** Web Application Development, Software Engineering, Data Structures and Algorithms, Machine Learning, Operating Systems, Computer Architecture

Technical Skills

Web & Programming: React.js, Next.js, HTML5, Tailwind CSS, JavaScript, Python, SQL, XML, DAX

Machine Learning & Data: Machine Learning, Computer Vision, NLP, Data Cleaning, Data Modeling, Pandas, NumPy, Power BI, Advanced Excel

Databases & Cloud: MongoDB (Atlas, Compass), MySQL, Microsoft Azure

DevOps & Tools: Docker, CI/CD Pipelines, Git, GitHub, REST APIs, Streamlit, Flask, Tkinter, OpenCV, MediaPipe, Figma, Trello, Android Studio, Medium Automation

Projects

Erythroblastosis Fetalis Risk Predictor | *Live App* | *Source Code* Python | Machine Learning | Data Analysis

- Developed a machine learning-based system to predict the **risk of Erythroblastosis Fetalis (EF)** using medical input parameters.
- Performed **data cleaning, preprocessing, and feature selection** to improve model reliability and prediction accuracy.
- Deployed the model as an interactive **Streamlit web application** for real-time risk assessment.

Multi-Channel Placement Notify System | *Source Code* Python | Automation | APIs

- Built an automated notification system to broadcast **placement updates across multiple channels** from a single source.
- Integrated APIs to enable seamless message delivery and reduce manual communication overhead.
- Improved information reach and response time through centralized, automated notifications.

ZenasBot – Telegram AI Assistant | *Source Code* Python | LLaMA 2 (7B) | NLP

- Developed an AI-powered Telegram chatbot using the **LLaMA 2 (7B)** language model for intelligent conversations.
- Integrated the bot with the **Telegram API** using **python-telegram-bot** for reliable message handling.
- Ensured stable performance and continuous availability with efficient backend integration.

Work Experience

Coding Blocks Student Chapter KARE

Jul 2025 – Present

Vice President

Kalasalingam University, TN

- Spearheaded strategic initiatives and coordinated with 400+ student members to organise **coding competitions, hackathons**, and collaborative projects, driving community engagement and growth.
- Project development, fostering a culture of peer learning and technical excellence within the chapter.

CSEdge

Apr 2024 – Apr 2024

Python Programming Intern

Remote

- Completed a one-month remote internship focused on Python development, working on practical coding tasks.
- Developed a **real-time face and hand detection system** in Python, achieving **95% accuracy** using OpenCV and Mediapipe, processing **30+ FPS**.

Publications

Research Publication-1 | *View Publication*

Springer Nature – Feb 9, 2026

- Title: Bridging Engagement Analytics and Task Management for Quality Online Education: An SDG 4 Approach
- Developed EduVision Analyzer, a real-time system designed to address the engagement gap in digital learning environments.
