Summary

B.Tech IT student experienced in building machine learning and data-driven systems, with strong skills in Python, SQL, and backend development. Developed ML applications, automation tools, and computer vision systems.

Education

Kalasalingam University

Expected Graduation: April 2027

Bachelor of Information Technology — 6th Sem

Krishnan Koil, TN

- **CGPA: 7.05**
- **Relevant Courses:** Web Application Development, Software Engineering, Data Structures and Algorithms, Machine Learning, Operating Systems, Computer Architecture

Technical Skills

Programming, Backend & Web: Python, JavaScript, SQL, Node.js, React.js, Next.js, HTML5, Tailwind CSS, REST APIs, XML, DAX

Machine Learning & Data: Machine Learning, Computer Vision, NLP, Data Cleaning, Data Modeling, Pandas, NumPy, Power BI, Advanced Excel, Data Pipelines, ETL Concepts

Frameworks & Tools: OpenCV, MediaPipe, Streamlit, Flask, Tkinter, Docker, CI/CD Pipelines, Git, GitHub, Figma, Trello, Android Studio

Databases & Cloud: MongoDB (Atlas, Compass), MySQL, AWS

Projects

Erythroblastosis Fetalis Risk Predictor | *Live App* | *Source Code* **Python | Machine Learning | Data Analysis**

- Developed a machine learning-based system to predict the **risk of Erythroblastosis Fetalis (EF)** using medical input parameters.
- Performed **data cleaning, preprocessing, and feature selection** to improve model reliability and prediction accuracy.
- Deployed the model as an interactive **Streamlit web application** for real-time risk assessment.

Multi-Channel Placement Notify System | *Source Code*

Python | Automation | APIs

- Built an automated notification system to broadcast **placement updates across multiple channels** from a single source.
- Integrated APIs to enable seamless message delivery and reduce manual communication overhead.
- Improved information reach and response time through centralized, automated notifications.

ZenasBot – Telegram AI Assistant | *Source Code*

Python | LLaMA 2 (7B) | NLP

- Developed an AI-powered Telegram chatbot using the **LLaMA 2 (7B)** language model for intelligent conversations.
- Integrated the bot with the **Telegram API** using **python-telegram-bot** for reliable message handling.
- Ensured stable performance and continuous availability with efficient backend integration.

Work Experience

PhytoMaps

Present

Computer Vision / Data Analysis Intern

Remote

- Working on drone-based **aerial imagery analysis** for plant health monitoring and landscape management.
- Assisting in processing and visualizing geospatial data to generate **plant health maps and analytical insights**.
- Supporting development of data-driven visual reports for detecting plant stress and environmental patterns.

Coding Blocks Student Chapter KARE

Jul 2025 – Present

Vice President

Kalasalingam University, TN

- Spearheaded strategic initiatives and coordinated with 400+ student members to organise **coding competitions, hackathons**, and collaborative projects, driving community engagement and growth.
- Project development, fostering a culture of peer learning and technical excellence within the chapter.

Publications

Research Publication-1 | *View Publication*

Springer Nature – Feb 9, 2026

- Title: Bridging Engagement Analytics and Task Management for Quality Online Education: An SDG 4 Approach
- Developed EduVision Analyzer, a real-time system designed to address the engagement gap in digital learning environments.
